

# THINGS TO DO AND DRAW AT COLLECTIVE

## Welcome to Collective

In this walled garden you will find a mixture of old and new; new art, old clocks and telescopes, places to eat and things to buy. This worksheet gives you some ideas of things to do and draw.

This place is called an Observatory, used for looking at stars and planets to understand what time it is. This was a place for people to look and think, something that we hope you will do while you are here along with having fun.

## Transit House

In the window is one of the first clocks in Edinburgh – you had to climb up the hill to find out the time.

What do people use to tell the time now?

Can you draw the shadow the sun makes from the side of the buildings overleaf?

## Inside Collective

What three words would you choose to tell someone about the art here?

How does looking at this artwork make you feel? Warm/cold/happy/sad/confused/excited?

Tell someone else about what you did today and what were the best bits. Come back another time and there will be different art to look at and think about.

Collective has 2 places where you can see art made by living artists – the City Dome and The Hillside.

When you look at the art:  
List of all the things you can see or hear.

Look for the smallest thing you can see. Draw it overleaf.

## Rooftop Viewing Terrace

If it isn't too cloudy you can see a long way away from here. Can you spot any of these things?

- A bridge
- An island
- A mountain
- A boat

## Meridian Line

Can you spot the line of slightly different stones on the ground outside The Hillside? This shows the Meridian line. Look up at the City Observatory – can you see where the line matches up with the window in the roof?

Can you balance along this line without stepping off?

Can you draw the meridian line onto the map?

## Collective Grounds

There are rocks and long grass outside. Can you see any wee beasties?

Draw a picture of one you find overleaf.

Can you complete this map with the rocks and seats you can find in the grounds?

## Monuments

Monuments are built to remind people to remember something. There are lots of monuments on Calton Hill.

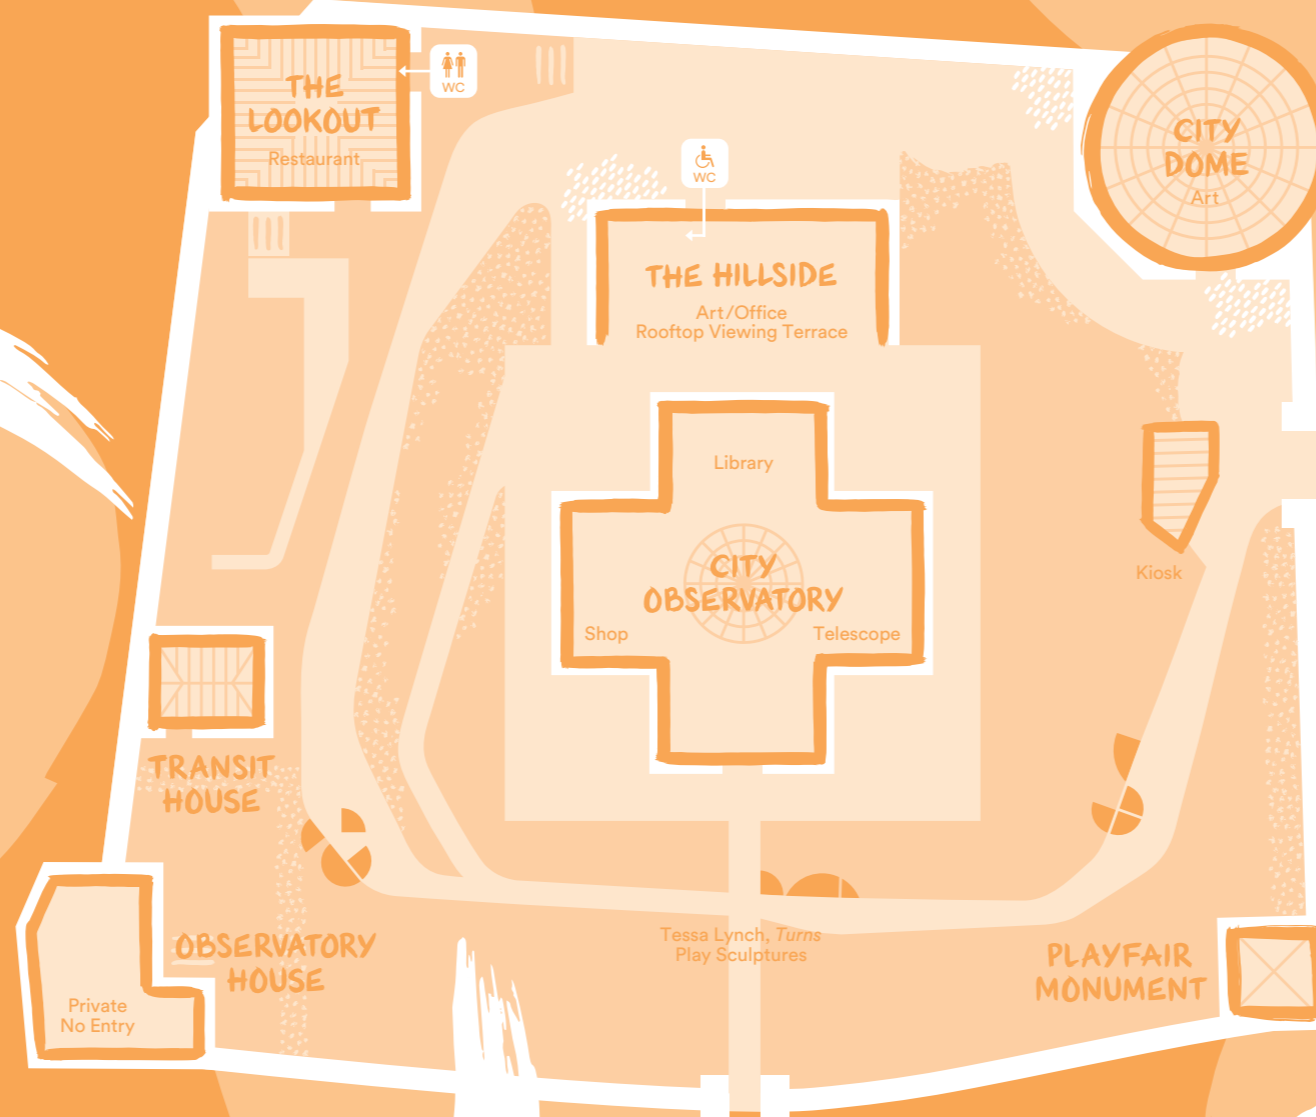

What do you want people to remember about today?

What would your monument look like? Draw it overleaf.

## The National Monument

Look outside the walls to see this monument. It looks like part of a building without a roof because it was never finished.

How many tall columns can you count on the National Monument?

## Compass

Look across to Edinburgh Castle. The Castle stands on a rock so old that it was there when dinosaurs were alive.

Draw the kind of dinosaur you think roamed on Castle Rock overleaf.

## SOUTH ENTRANCE

There are four directions (North, South, East and West) and a compass tells you which direction is which.

From Calton Hill you can see all over Edinburgh – can you tell which direction on the compass these things are:

- Edinburgh Castle, Leith Docks,
- Berwick Law & Arthur's Seat
